Profile

M.S. Computer Science student (2027) with experience in NLP, spoken dialogue systems, multimodal research, and practical software development. Built research evaluation pipelines and data-processing systems using Python/PyTorch.

Education

Institute of Science Tokyo M.S. in Computer Science • Intelligent Robot Dialogue Laboratory (Yoshino Lab); Grade: 91.2/100	Apr 2025 – Mar 2027 (expected)
National Tsing Hua University , Taiwan B.S. in Computer Science and Engineering • GPA: 4.01/4.30; exchange at Tokyo Institute of Technology, Oct 2022 – Aug 2023 (Grade: 92/100)	Sep 2019 – Aug 2023

Research Experience

Research Assistant , Yoshino Lab – Multimodal Mathematical Reference Resolution • Study how spoken references are grounded to mathematical objects in visual workspaces, covering data and annotation design, candidate ranking, and multimodal model evaluation. • Presented stages of this ongoing research at the Symbolic-Neural Learning Workshop (2025), Dialogue System Symposium (2025), and NLP2026 (non-peer-reviewed presentations).	Jul 2025 – Present
--	--------------------

Experience

Student Intern , Nexa Science, Tokyo, Japan • Built a Python/PyTorch pipeline connecting ASR, LLM-based post-editing, dialogue state tracking, and automatic evaluation. • Designed experiments and analyzed how ASR errors, particularly named-entity errors, propagate to downstream task performance.	Sep 2025 – Dec 2025
Software Engineer Intern , Dykoo Inc., Taichung, Taiwan • Developed order-splitting and data-processing workflows using Python/Pandas, Excel, Firebase/Firestore, GCP Cloud Functions, and SvelteKit. • Automated a half-day manual order-organization workflow into a brief run-and-review process for a company user.	Jan 2024 – Apr 2024

Student Project

Facial Features Transferring – NTHU Senior Project github.com/Ihsin-Chen/pixel2style2pixel • Built a StyleGAN2/pixel2style2pixel pipeline; implemented geometric warping and color correction with Python/OpenCV and integrated MediaPipe face-mesh alignment. NTHU Senior Project Competition finalist.	Feb 2022 – Sep 2022
---	---------------------

Honors

Watanuki International Scholarship Foundation Scholar – university-recommended	Apr 2026 – Apr 2027
JASSO Scholarship	Oct 2022 – Aug 2023
Exchange Student Scholarship – academic performance	Oct 2022 – Aug 2023
Academic Excellence Award – Top 5%, NTHU	Spring 2022

Skills

Technologies: Python, PyTorch, TensorFlow, C/C++, TypeScript, SQL, OpenCV, Firebase/Firestore, Git, LaTeX; AI-assisted development

Focus Areas: NLP, spoken dialogue systems, ASR, dialogue state tracking, multimodal reference resolution, evaluation pipelines

Languages: Mandarin (native), Taiwanese (native), English (IELTS 7.5, TOEIC 910), Japanese (JLPT N1)
